

### Who are Embrionic?

Embrionic Limited is a well established and successful IT consultancy. A team of skilled and enthusiastic specialists, we have a distinctive approach to the way we work, producing durable business solutions.

### Why use Embrionic?

Simply because you'll get real experience and dynamism from a youthful team dedicated to doing the best for your business. A refreshing difference in IT – ask our customers.

### What makes us tick?

At Embrionic we pride ourselves in providing expert advice and assistance to our clients. We seek to be a key partner enabling our customers to achieve outstanding IT driven success.

### What do you get from Embrionic?

Benefits and Satisfaction.

Using our experience and innovative approach, we can show you:

- How to optimise your new environment
- How to migrate with the least hassle
- How to fast track your deployment to minimise disruption

Since its inception, Embrionic has specialised in the migration of both simple and complex systems. Together, our consultants have assisted in the migration of nearly one million Exchange seats. That is why, as a Microsoft partner regularly working alongside Microsoft Consulting Services, Embrionic will help you make the very most of your migration.

# Time is Running Out!

**31<sup>st</sup>  
December**

## Migrate now from Microsoft Exchange Server 5.5

From 31<sup>st</sup> December 2005, extended Microsoft support for Exchange Server 5.5 will cease.

From 1<sup>st</sup> January 2006 Microsoft will no longer take support calls, provide security patches or hot fixes for Exchange Server 5.5

### What will it mean to me?

Your business will be vulnerable if you remain on an outdated and unsupported platform. The world of messaging has changed significantly since the Exchange Server 5.5 design was completed over eight years ago. Greater threats from viruses, spam and Internet security have produced new challenges. As the workforce has become increasingly mobile, so messaging has moved from an important application to become critical.

### Migrate with Embrionic

As an established Microsoft Partner, Embrionic will take you through a quick, smooth transition, with minimum disruption and maximum benefit for your business. We will help you avoid the immediate pitfalls, whilst providing essential knowledge transfer to your technical staff for the future.

## Time is short

Check out some of the issues:

Have you migrated to Active Directory?

Do you use Exchange dependent applications?

Is your current Exchange environment patched to the correct levels?

Is your administrative model best for you?

Do you want to change your Exchange environment as a result of your current experiences?

Do you have legacy connectors?

Have you deleted those mailboxes, public folders, distribution lists and custom recipients you no longer require?

Are your staff trained in Active Directory and Microsoft Exchange 2003?

Do you need to deploy Microsoft Office 2003?

Have you sufficient monitoring capabilities in place to support Exchange 2003?

Do you have the necessary anti-spam and virus checking in place?

Does your business need to provide mobile and secure web access?

Get the answers with Embrionic

## Why are companies migrating to Microsoft Exchange Server 2003?

Microsoft Exchange Server 2003 is the leading messaging and collaboration platform.

Key customer benefits are:

- Server consolidation
- Realise the benefits of Microsoft Outlook 2003 with Exchange Cached Mode
- Improved performance and stability
- Maintain a single directory
- Increased security
- Ability to split mailbox stores
- Enhanced cluster support
- Improve or introduce business continuity plans
- Enhanced recovery using the Recovery Storage Group
- Mobility
- Integration with third party archiving and mail security products
- Full Microsoft Support for security patches, hot fixes and call incidents
